Product Change Announcement

Effective Date: March 10, 2016
Countries: GLOBAL
From: Nicole Nelson, GPM Portables
Inventory: Rolling Change

Product Name: TLS2200®/PC Link Supply Core Upgrade

X	Product Change
	Replacement Product
	Obsolete
	Other – Part number change

SUMMARY

REFERENCE: Upgraded TLS/PC Link Supply Core

Due to customer needs and feedback, the core of the TLS supplies is receiving an upgrade.

1. Improve loading by using new side tabs to secure material into printer
2. Easier storage and change-over of the material (preventing rolling off surfaces and telescoping)
3. More secure contact to the smart cell bay

Rolling change in inventory starting March 10, 2016. Custom TLS supplies will receive this upgrade after April 2016. Catalog and Part numbers stay the same. You can identify the parts by their new brown more eco-friendly boxes. Parts are interchangeable as your current TLS parts and the upgraded parts will both work in TLS and PC Link printers.

For customers using the BMP71 with the media adapter, in order to use this upgraded supply, printers will need the new Media Adapter (catalog # M71-ADAPT-BK, color black) and a firmware upgrade. (*see product change announcement regarding BMP71 upgrades)
