AGREEMENT NO: 081213180007

TE CONNECTIVITY ENTITY: RMP (1082) - U.S. Operations on SAP

We would like to inform you about the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

GENERAL PRODUCT DESCRIPTION:

RING TONGUES AND PIN RECEPTACLES

DESCRIPTION OF CHANGE:

This is to notify of change to the reel material / dimension for the TE part numbers listed on this notification produced at the US Lickdale facility . The reels chosen to replace the current plastic reel have been used Globally for wide variety of TE terminals and provide excellent product protection. The reel material type will change from plastic to corrugated. The overall reel width outside to outside will remain the same. The corrugated reel drive hole and center hole will work with the same application equipment as used with the current plastic reel.

REASON FOR CHANGE:

New specification. The primary differences include: - Material , current plastic versus corrugated used for future shipments - Shape of reel flange. Current plastic reel is round and corrugated is octagon shape - Reel flange diameter . The plastic reel flange diameter is 266.7 mm (10.5") . The corrugated reels off two different reel flange diameters based on selection of reel used. The smaller reel has a maximum flange diameter of 285.75mm (11.25") and the larger corrugated reel has a maximum flange diameter of 381 mm (15.0"). The core and center hole , drive hole configuration
