PRODUCT UPDATE

Written by | PRODUCT & APPLICATIONS | August 7, 2018 | #202

ERN Model - S Series
Standardization of Grounding Tag Position

Summary:

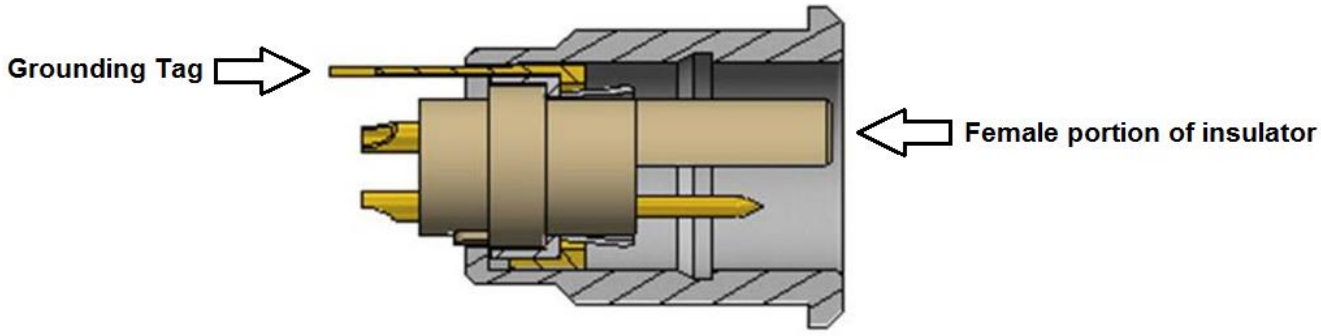

The orientation of the grounding tag for the ERN model has been standardized.

Details:

The grounding tag orientation for the ERN model in the 0S, 1S, 2S and 3S Series is becoming standardized and will be located 'in-line' with the female portion of the insulator with solder and crimp contacts as shown in the attached sketch (below). Legacy product, depending on size, wasn't always located in the same position. The ground wire length may need to be adapted to accommodate this change.

This change affects both metal and plastic versions of the ERN model.

Printed Circuit Board (CLN suffix) and other specialty types with suffixes such as CLNY or CLNW will not be affected.

Timing of change:

Product with the updated grounding tag locations are now available for ordering.

If you have any questions or concerns regarding this change, please contact Customer Service or Applications Engineering at 1-800-444-5366 or email: info-us@lemo.com. Thank you for your continued support of LEMO products!
