TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:
Solder devices as per attached list of parts.

Description of Changes
Eliminate Hexabromocyclododecane (HBCDD) from the flux composition

Reason for Changes:	
Manufacturing / Process Requirements. Based on our findings as highlighted on the NOE, we are actively working with our supplier to source an alternate flux which does not contain HBCDD. As a result of this change, we are doing all relevant tests required to ensure the new parts have the same level of performance and comply with the TE internal specifications as well as external agency specifications including the MIL approvals as and where applicable.
