UL recognition of HIF3B and H series and UL recognition label on the outer box.

We will contact you as follows regarding the products that do not change the product name in SABIC Material Change Notice (Business 430-18025) issued in July 2018.

1 Details

When changing the manufacturer of resin materials for the HIF3B and H series, we reapplied for UL certification for the standard products listed in the catalog, changed our product name, and affixed the UL recognition label on the outer box as a UL certified product.

However, the product names of other HIF3B and H series, which are not listed in the catalog, have not been changed because they are the products that developed based on the special requirements from limited customers.
Therefore, according to the request of the UL recognition party, it is not possible to attach a label to the outer box as a non-UL certified product.

We will contact you again as the material manufacturer change time for HIF3B and H series products not listed in the catalog is approaching.

2 Products

Please refer to Attachment 1.

3 About product performance

As notified in 430-18025, there is no difference in appearance and product performance due to the change.

4 About switching date

Scheduled to start switching sequentially from October 2021.

5 Others

We are ready to submit the necessary materials for reacquiring UL recognition for these products, so we can provide them and apply as a UL certified product if necessary.
* The product name needs to be changed because of the UL regulation.

In case you need UL recognition for product itself although the material is UL recognized, please contact our sales staff.
