Product Change Notification

PCN #: 20240828-01 Rev. A

Change Title: Addition of new potting compound of the AZ742, AZ763 and AZ764 series relays.

Products Affected: AZ742, AZ763 and AZ764 series

Time schedule:
Effective: Ongoing long-term addition

Reason for change:
Avoidance of problems in the raw material supply chain.

Detailed description:
The potting compound Damival (green color) will be introduced in relay production with immediate effect in order to avoid problems in the raw material supply chain.

This change doesn't affect the electrical performance and ratings of the components.

The potting compound Damival meets all applicable requirements of the relay standard EN 61810-1. The potting compound is homologated according UL94-V0 flammability class. It is covered under UL file no. E513702. Existing UL listings and VDE certificates of the products listed above are not affected.

Before:	After:
• Dolphon (Black potting compound) • Raku-Pox (Black potting compound)	• Dolphon (Black potting compound) • Raku-Pox (Black potting compound) • Damival E111 with hardener H801 (Green potting compound)

Additional support documentation:
On request, ZETTLER can provide datasheets for the previous and new potting compound.
