Klippon® Relay

Product discontinuation note

RIDERSERIES RCL

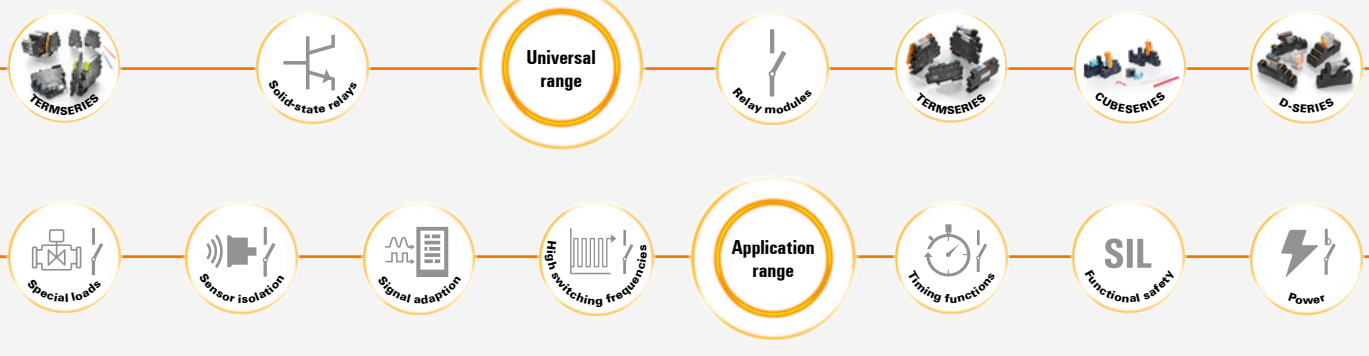

RIDERSERIES RCL successor - CUBESERIES CRI relay modules
The RIDERSERIES RCL relays and KITs will be discontinued and replaced by our new CUBESERIES CRI relays and KITs.

The CUBESERIES CRI miniature industrial relays with a space-saving width of 16 mm for reliable switching of small industrial loads and fast and secure installation.

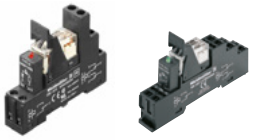

Your special advantages:

- 1 CO contact (16 A) and 2 CO contacts (8 A)
- Versions with and without test button
- Coloured test buttons or housings (AC coil: orange, DC coil: blue)
- Matching accessories such as cross-connections, retaining clips and LED modules
- Pluggable LED modules with red and green status LED
- Relay sockets available with PUSH IN or screw connection

Important note: The respective accessories (relay sockets, retaining clips, LED modules, markers, etc.) of the RIDERSERIES RCL relays are not compatible with the alternatively offered products of the CUBESERIES CRI. Therefore, the accessories must also be switched to the CUBESERIES CRI. The alternatives listed are the closest possible successors to the discontinued products. Major differences are described in the comments for the new product. However, the suitability of the successor must be thoroughly reviewed, as the products are not absolutely identical.

KITs - preassembled relay modules
