Product Change Notification

Current Date: 16-Oct-2026

TE Connectivity

Product Change Notification: P-26-031734 **PCN Date:** 14-OCT-26

Customer: Heilind Electronics Inc(0002135900) **Location:** WORLDWIDE **Agreement:** Agreement Unknown

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:
Formulation Change to DR-25 Heat-Shrink Tubing

Description of Changes
TE Connectivity manufactures DR-25 elastomeric heat-shrink tubing using a proprietary elastomeric polymer compound developed by our material scientists from a controlled blend of raw materials.Due to a supplier-enforced change within our upstream supply chain,one of the raw materials used in the DR-25 formulation is no longer available with immediate effect.To ensure continuity of supply, TE has qualified an equivalent alternative raw material, based on a material recommended by our Tier 1 supplier. The alternative material maintains the same chemistry and performance characteristics as the original material and does not affect the form, fit or function of the finished DR-25 product. TE has completed validation testing of the updated formulation and confirmed that DR-25 manufactured using the alternative material meets or exceeds all applicable TE internal product specifications.Qualification to VDE VG and QinetiQ QPL is achieved for DR-25 tubing manufactured at our European facility. **Other attachments:** PCN DR-25 Formulation change

Reason for Changes:	
Product improvement.Qualification trials are underway at our USA facility.Once completed,the updated formulation will support the continued supply of commercial DR-25 products to customers in the Americas. The MIL spec qualified DR-25 manufactured in our US facility currently undergoing NAVAIR qualification for the material change, with release of the US-produced parts expected in mid-2027. This change will provide TE with two qualified raw-material options for the manufacture of DR-25, should the original material become available again.Maintaining both qualified options will improve supply-chain robustness and continuity of supply, while reducing the potential need for further requalification should availability of either material change in the future.This change is effective immediately. If you require further information regarding this change, please contact your TE Connectivity representative. Sincerely, The TE Connectivity team.	
Estimated Dates:	
Last Order Date (Obsolete Parts Only):	**First Date To Ship** (Changed Parts Only):
	14-OCT-2026
