

POSITIVE LOCK RECEPTACLES AND HOUSINGS

Quick Reference Guide

TE Connectivity's (TE) Positive Lock Mark II receptacles are specifically designed to provide ease of assembly and secure retention to mating tabs. TE's Positive Lock receptacles lock onto mating tabs and are removable only by deflecting an integrally designed repressor prior to withdrawal. Housings insulate and serve as removal tools.

KEY FEATURES

- Integral lever locks receptacles onto tabs
- Low insertion force for improved ergonomics
- High temperature Positive Lock terminals operate in temperatures up to 250°C and the high temperature housings operate in 240°C
- High temperature housings meet Glow Wire test and UL 94 V-0

WHY SPECIFY POSITIVE LOCK PRODUCTS?

- Help improve system safety and ease of assembly with low insertion and extraction forces
- Deliver reliable electrical performance with enhanced contact surface design
- Confirm fully mated connections with audible confirmation of tab insertion
- Terminate with TE application tooling for uniform high quality crimps
- Improve strain relief with insulation support
- High temperature receptacles provide superior performance with high conductivity using high-strength low-alloy steel instead of stainless steel

TARGET MARKETS/APPLICATIONS

- Refrigerators and freezers
- Dishwashers, washers and dryers
- Ranges/ovens
- Passenger cars
- Off-road vehicles
- Trucks and buses
- Control cabinets
- Robotic arms
- Rail cars
- Subsystem design

POSITIVE LOCK RECEPTACLES AND HOUSINGS

Quick Reference Guide

POSITIVE LOCK MARK II RECEPTACLES AND HOUSINGS

Terminals are tin-plated brass and rated for a maximum of 105°C. Housings are natural color nylon.
